

Bake Your Face with Translucent Loose Powder

How It Works:

- **Universal shade.** Eliminate the need for shade matching with one powder that can provide an invisible oil-controlling finish to all skin tones — from very fair to dark. It sets foundation for a perfectly natural finish and has light-diffusing properties to leave skin with a silky-smooth appearance.
- **Weightless and suitable for all skin types, including sensitive skin.** It creates sheer, natural highlights without settling into pores or fine lines. All you'll see is makeup that looks fresh throughout the day. Eliminates shine and never looks chalky.

How to Apply:

- Dip the Mary Kay® All-Over Powder Brush into the powder. Tap off any excess.
- Using light, long, downward strokes, apply powder starting at the forehead and moving down to the chin, covering the entire face.
